

WORKPOINT

WorkPoint

cloud time-tracking & PSA solutions

When one needs to track time, manage time-off, plan employee performance, manage project indicators, or send an invoice for T&M projects — WorkPoint takes the helm.

What is WorkPoint?

Timesheets and time-off: WorkPoint tracks working time using timesheets and time-off requests. **Clients, projects, and resources:** WorkPoint allows for management of KPI by collecting analytic information. **Billing and invoice management:** WorkPoint thoroughly tracks each and every paid working hour.

Why customers use WorkPoint?

- To increase resource utilization.
- To increase projects & processes efficiency.
- To improve cash flow.

Easy to use

- Role-based & user-friendly UI.
- Convenient and light web client.
